ADULT OCCUPANT PROTECTION

Frontal offset deformable barrier test

11.5 p

Side movable deformable barrier test (car)

15.7 p

- GOOD
- ADEQUATE
- MARGINAL
- WEAK
- POOR

Bodyshell integrity (frontal) **UNSTABLE**

Side impact protection doors (Structural) **YES**

Side pole impact test (pole)

OK

**Comments**

Frontal impact: the protection offered to the driver's and passenger's head and neck was good. Driver's chest showed marginal protection and passenger's chest showed good protection. Driver's and passenger's knees showed marginal protection as they can impact dangerous structures behind the fascia. Driver's tibias showed adequate protection and passenger's tibias showed good and adequate protection. Footwell area was rated as unstable. The bodyshell was rated as unstable and it is not capable of withstanding further loadings.

Side impact: head, pelvis and abdomen showed good protection while chest showed adequate protection.

Side pole impact: curtain airbags are standard and meet the fitment requirements showing good protection to the head and pelvis, marginal protection to the chest and adequate protection to the abdomen.

ESC is fitted as standard and the performance shown in the test was acceptable according to Global NCAP's latest requirements.

SBR is standard in all seating positions but only meets the requirements in the front positions. All this explained the 5 star result.

Comments

Frontal impact: the child seat for the 3 year old was installed rearward facing using the i-size anchorages and a support leg and it was able to prevent head exposure during the frontal impact offering full protection. The child seat for the 18 month old was installed rearward facing using the i-Size anchorages and a support leg and it was able to prevent head exposure during the frontal impact offering full protection.

Side impact: both CRS's offered full side impact protection.

The car offers 3 point belts in all seating positions as standard in all versions. The marking warning consumers about rearward facing CRS in the front passenger position fulfils the requirements. It does not offer the possibility to disconnect the passenger airbag in case a rearward facing CRS will be installed in this position. The CRS installation passed for all assessed CRS.
