DRIVER FRONTAL AIRBAG	NO	SIDE HEAD AIRBAGS	NO	ISOFIX ANCHORAGES	NO
FRONT PASSENGER FRONTAL AIRBAG	NO	DRIVER KNEE AIRBAG	NO	ABS (4 CHANNEL)	NO

ADULT OCCUPANT

The protection offered to the driver chest was poor and the head protection was weak. The passengers' knees could impact with dangerous structures in the dashboard like the Transfascia tube as well as the shock absorber mounts mainly from driver side. The bodyshell was rated as unstable and can not withstand further loadings.

CHILD OCCUPANT

The child seat for the 3 year old child was able to prevent excessive forward movement during the impact however the biomechanical readings were above the limits. The dynamic performance of the 18 months child restraint was adequate. However, the installation instructions on both child seats were insufficient and not permanently attached to the seat. Both CRS were compatible with the belt system on the vehicle. This vehicle was not equipped with a passenger airbag.
